

QUICK SAFETY GUIDE

(To be used alongside the full Assembly & Safety Manual)

1. Supervision

- Children must be supervised at all times.
- Set clear rules for safe use, especially when multiple users are on the frame.
- Allow only age-appropriate activities based on user ability.

2. Ground & Stability

- Ensure the frame is placed on **level or slightly sloping ground** with all base plates firmly touching the ground.
- Check ground pegs are fully inserted.
- Stop use if the frame leans, rocks, or shifts.

3. Safe Use

- Use only for normal climbing, swinging, gymnastics, calisthenics, and parkour-style movements.
- Avoid pushing, rocking, or trying to move the frame.
- Do not overcrowd the equipment.
- Do not attach unapproved accessories.

4. Before Use on a Play Day (Quick Visual Check)

- Frame appears stable and square.
- Ground under base plates is firm and level.
- Moving accessories (swings, rings, trolleys) move freely without wear.
- No visible damage or sharp edges.
- *(This check replaces the need for daily tightening.)*

5. Routine Maintenance

Every 1–2 Weeks

- Tighten all bolts, grub screws, and clamps.
- Ensure ground pegs are secure.
- Inspect caps/covers and replace if damaged.
- Check accessories (swings, rings, chains, trolleys) for wear.

Every Month

- Inspect for corrosion, deformation, or movement in the frame.
- Lubricate metallic moving parts if needed.
- Ensure warning labels are present and readable.

After Heavy Rain, Frost or Soft Ground

- Re-check ground contact at all base plates.
- Ensure the frame remains stable and aligned.

Two Weeks After Assembly

- Retighten all fittings to maximum achievable torque.

6. Stop Use Immediately If...

- The frame rocks or shifts under load.
- A fitting cannot be tightened.
- Structural parts are bent, cracked, or heavily corroded.
- Accessories show significant wear or fraying.
- Do not resume use until the issue is corrected.
